Core Strengths: Process documentation, operational consistency, cross-functional collaboration, stakeholder communication

Professional Experience

Apple – Technical Project Manager | 2023 – January 2024

- Supported operational governance, compliance documentation, and process improvement initiatives within global Apple teams across EMEA and APAC.
- Developed and maintained internal training and compliance documentation to improve consistency in repair service workflows.
- Reviewed and updated operational procedures by removing outdated steps and improving clarity and usability.
- Collaborated with cross-functional teams to ensure alignment of operational standards and

service procedures.

- Maintained structured documentation of workflows and process updates using enterprise collaboration tools.

Apple – Genius Senior Technical Specialist | 2018 – 2023

- Ensured adherence to Apple privacy and operational policies in a high-volume technical support environment.
- Identified recurring technical issues and escalated potential risks to engineering and support teams.
- Provided policy-aligned troubleshooting and customer support in a fast-paced environment.
- Contributed to internal documentation and knowledge sharing to improve team consistency.

Apple – Technical Specialist / AppleCare Expert | 2015 – 2018

- Supported secure handling of customer data and device troubleshooting in compliance with internal policies.
- Communicated technical guidance and security-related information to non-technical users.
- Documented system issues and support patterns for internal escalation and review.

Verizon – Sales Manager | 2010 – 2015

- Delivered onboarding and training support reinforcing operational procedures and compliance expectations.
- Managed daily retail operations and scheduling in a high-volume environment.
- Supported team performance through structured workflow and issue resolution.

Education

Per Scholas Cybersecurity AI Program (In Progress)

University of Maryland Eastern Shore – Business Administration (90/120 credits completed)
